Sr. Software Developer with 5+ years of experience contributing to successfully delivering complex software solutions across 14 projects. Proven ability to collaborate with cross-functional teams and apply expertise in PHP, Python, Spring Boot, Docker, Postgres, and system design, with experience designing and implementing scalable systems that handle up to 500,000+ users and process billions of records. Collaborated with teams of 4–10 engineers, product managers, and QA to meet project deadlines with a 95% on-time delivery rate and focused on writing maintainable, testable code with over 85% unit test coverage in most projects.

Experience

JUNE 2023 – PRESENT

Sr. Software Developer For EDA Inc. | Euracle Corp. | Remote

- Developed a scalable organizational culture analytics pipeline using Python, Pandas, and Sentence Transformers, enabling executives across 6 organizations to make decisions through data insights.
- Boosted pipeline performance by 85% via multiprocessing, query optimization, and logic restructuring.
- Designed and deployed culture analytics surveys, dashboards, and reporting portals using PHP, Vanilla JavaScript, and CSS, to create culture analytics of over 5000 employees across 6 organisations while enhancing user engagement and satisfaction.
- Ensured data privacy and security through Python best practices and GDPR-compliant data handling for over 100 employees for a European client.
- Collaborated with a small team of 3 peers, including a business analyst, tester, and developer, to architect robust, maintainable technical solutions.
- Improved user and mobile experience by implementing deep linking in the investor app using Flutter and the go_router package, which boosted the retention by 95%.

JULY 2021 – APRIL 2023

Software Developer | LenDenClub | Remote

- Led development of a microservices-based Lending, Funding, and Disbursal platform using Django and REST APIs, reducing loan disbursal time by 98%.
- Mentored a team of 6 (2 juniors, 1 graduate trainee, and 3 interns), contributing to team skill growth and code quality improvements.
- Resolved critical production issues and designed automation tools, reducing customer support tickets by 57%.
- Partnered closely with 4 business analysts, 3 QA testers, and other stakeholders to deliver aligned, impactful solutions.

SEPTEMBER 2020 – JULY 2021

Associate Software Engineer | Amdocs | Remote

- Contributed to the development of a microservices architecture that had over 23 microservices running for network-level service orchestration using Spring Boot, Kubernetes, HELM, and PostgreSQL.
- Upgraded legacy components to modern standards, improving reliability and system maintainability.

- Introduced test automation with Selenium, significantly cutting QA team's manual testing workload.

SEPTEMBER 2019 – JULY 2020

Full-Stack Developer (Part-Time) | Euracle Corp. | Remote

- Delivered full-stack web and mobile applications across 5 client projects, using Django, Spring Boot, Angular, Flutter, Ionic, and PostgreSQL.
- Handled end-to-end development and testing, ensuring timely delivery aligned with client specifications and quality standards.

Projects

JUNE 2019 – MARCH 2020

Naytra Raksha (Final Year Project)

- Lead a team of 2 to research and develop a novel solution for early detection of Diabetic Retinopathy in real-time.
- Employed DNN, CV, Keras, and customized Resnet-50 for classifying malignancy, Faster-RCNN for symptoms localization with 98% accuracy, and Django for Web application and visualization.

DECEMBER 2018 – JUNE 2019

Smart Inline Inspection (SILI) Tool (Hackathon Winner)

- Led the ML discipline in the interdisciplinary team of 8 peers for detecting and predicting trends of wax deposition in a crude oil pipeline by employing Keras, Arduino, Ultra-Sonic sensors, Django, Seaborn, matplotlib, AutoCAD, and 3D printing.

DECEMBER 2018 – AUGUST 2019

Smart Fish Pond Water Monitoring (IEEE Sponsored)

- Led a team of 4 to solve the problem of monitoring, predicting, and alerting the quality of fish farm ponds based on Ph, Temperature, and Dissolved Oxygen by using IoT, RaspberryPi, Ph, Temperature, and Dissolved Oxygen Sensors, and Regression models.
- This project is estimated to reduce the cost by 96.67% for the small-scale fisheries and farmers.

Skills

Django • Python • Agile/Scrum • IoT • Flutter • PostgreSQL • JavaScript • PHP • Ionic • MongoDB • Docker • GIT • Spring Boot • Java • MySQL • AWS

Education

MAY 2020

Bachelor of Engineering: Computer Engineering | Maharashtra Institute of Technology | Pune

8.16 CGPA

Achievements

Patent Granted - SILI Tool (Patent Number: 522541), 2024

SPOT Award - LenDenClub, 2022

Crowd Fund Raising (CFR) Champ - Make A Difference Foundation, 2022

Winner - Smart India Hackathon Hardware Edition, 2019

Winner - MIT INDICON, 2019

Runner up - Smart India Hackathon Software Edition, 2018

Paper published - ICDSMLA (Springer) Conference, 2020

Certifications

IBM Applied AI Professional Certificate (V3) - Coursera, 2022

Google Cloud Platform Fundamentals: Core Infrastructure - Coursera, 2020

Introduction to Quantum Computing Course - The Coding School, 2021

Extra Curricular

Foundational Programme Fellow- Make A Difference Foundation, 2023 to 2024

ED Support Fellow- Make A Difference Foundation, 2023 to 2024

Academic Support Volunteer- Make A Difference Foundation, 2022 to 2023

Technical Head- Texephyr, 2019 to 2020

President - CSI MIT Pune Chapter, 2018 to 2019

Organizer - MCUG, 2017 to 2019

Co-Organizer - Texephyr, 2018 to 2019

Activities

Game Development • Reading Books • Playing Piano • Weight Lifting • Digital Painting
